

SAHIL VIJAY SINGH

3rd Year B. Tech CSE Student

📞 7061517370 |  LinkedIn | ✉️ sahilvijaysingh15@gmail.com |  GitHub |  LeetCode

Professional Summary

Motivated Computer Science undergraduate with hands-on experience in developing and deploying full-stack web applications. I've worked on multiple projects that demonstrate my strong problem-solving skills and solid foundation in Data Structures and Algorithms. Passionate about learning emerging technologies, including modern backend systems and always eager to take on new challenges in the evolving tech landscape.

Skills

Programming: - C++, Java, Python, C, HTML, CSS, Java Script.

Technologies/Framework: - ReactJS, NodeJS, RESTful APIs, NumPy, Panda, Matplotlib, ExpressJS, MongoDB.

Developer Tools: - Git, GitHub, VS Code, Jupyter Notebook, Kaggle.

Concepts: - DSA, OOP, OS, Networks, DBMS, Machine Learning.

Soft Skills: - Team Work, Critical Thinking, Leadership, Problem Solving, Communication, Adaptability.

Area of Interest: - Backend Technologies : NodeJS, Problem Solving.

Internships

Full Stack Development Bootcamp Trainee | 6-Week Intensive Program

May 2025 - Jun 2025

- Completed structured training in Full Stack Development (HTML, CSS, JavaScript, React, Node.js).
- Strengthened Data Structures & Algorithms (DSA) fundamentals and problem-solving skills.
- Practiced coding problems to enhance interview readiness.
- Gained exposure to REST APIs and backend integration.
- Improved aptitude and soft skills including communication, teamwork and presentation skills.

Projects

PeerIQ- A Peer To Peer Academic Collaboration Platform [Live]

August 2025 – October 2025

- Developed a full-stack learning platform using React, Tailwind CSS, and Firebase with real-time chat, study groups, OTP authentication, role-based access, and Jitsi video integration.
- Implemented gamification features, Firestore security rules, notifications, and secure OAuth-based authentication for scalable and collaborative learning.

SafeDrive- IoT-Based Accident Detection & Pollution Monitoring System

January 2025 - February 2025

- Built an ESP32-based system integrating MPU6050, GPS, and gas sensors for real-time accident detection and pollution monitoring.
- Enabled automated emergency alerts via Wi-Fi/SMS (SIM800L) after testing accident simulations and emission spikes.

Peddify- Pet Adoption Website [Live]

May 2025 - June 2025

- Developed a responsive React-based pet adoption platform with admin dashboard, analytics, and advanced filtering features.
- Designed a scalable UI architecture with state persistence and deployed on Vercel, ready for backend and smart recommendation integration.

Certifications

- Java Core Foundation Certification from Oracle November 2024
- The Complete Full Stack Web Development Bootcamp From Udemy July 2024

Co-Curricular Activity

Participated in 6th Technovation – Hackathon | Sharda University

February 2024

- Designed and developed a working IoT prototype using ESP32 for real-time accident detection and vehicle pollution monitoring.

Smart India Hackathon (SIH) – Internal Finalist | Sharda University

September 2025

- Developed a Disaster Management platform with SOS features using the MERN stack and worked as a Frontend Developer, building responsive and user-friendly emergency interfaces

Education

Sharda University

2023-Present

Bachelor of Technology in Computer Science, Greater Noida India

Bradford International School

2023

Class XII (CBSE), Bihar India
